DIVISION OF LABOR STANDARDS  
MINE AND CAVE SAFETY

If you are coming on to mine property for the first time there is some important things you should know for your safety. You should ask the mine operator to provide you with the proper training or information.

**Miner Basic Training** in the following areas could prevent you from having an accident or being injured:

- Hazard Recognition
- Personal Protective Equipment
- Company Safety Rules
- Warning Signs and Signals
- Evacuation Procedures
- Emergency Procedures
- Traffic Patterns
- Loading Zones
- Dump Points
- Blast Site Area
- Restricted Areas

With this knowledge you will be better prepared to perform your duties safely and not become a statistic.

MISSOURI DEPARTMENT OF LABOR  
AND INDUSTRIAL RELATIONS  
DIVISION OF LABOR STANDARDS  
MINE AND CAVE SAFETY

As a **mine owner or operator** you are responsible for the safety and health of all that enter your mine site. To prevent your customers, contractors and delivery personnel from accidents or injury you should provide them with, **Miner Basic Training** in the following areas:

- Hazard Recognition
- Personal Protective Equipment
- Company Safety Rules
- Warning Signs and Signals
- Evacuation Procedures
- Emergency Procedures
- Traffic Patterns
- Loading Zones
- Dump Points
- Blast Site Area
- Restricted Areas

With this knowledge your customers, contractors and delivery personnel will be better prepared for safety.
